

SRD ADM Announcement – September 13, 2010

After several weeks of applications, interviews and organizational considerations.

I am now most pleased to make the following announcements regarding the appointments of ADMs for the department of Sustainable Resource Development.

Mr. Glenn Selland will be the new ADM - Lands Division. (effective immediately) Glenn has many years of experience with the department and has continually shown his desire to assume new and additional challenges. His ability to change with the times to implement new and more cost effective processes will be a great benefit to the Lands Division as he leads it into the future.

Mr. Bruce Mayer will be the new ADM - Forestry Division. (effective September 13th, 2010) Bruce has performed a multitude of duties within forestry for a considerable time. Bruce's experience both in the field and in head office give him the knowledge and experience to provide the leadership and direction both to the Forestry Division staff and stakeholders in the challenging times ahead.

Mr. Rick Blackwood will be the new ADM - Fish and Wildlife Division. Rick will also assume responsibility for coordination, direction and leadership of field operations. (effective September 22nd, 2010) Rick's very well rounded experience in all aspects of the SRD mandate of Forestry, Lands and Wildlife will serve him very well for policy development in the Fish and Wildlife Division and providing leadership to the operating areas throughout the province.

Eric J. McGhan
Deputy Minister
Sustainable Resource Development
