Dear Mr. Condon:

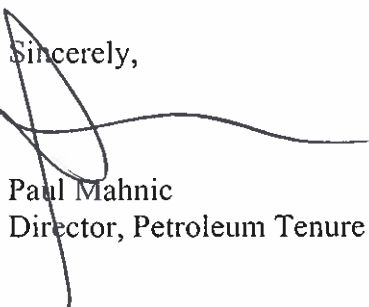

Re: Saskatchewan Crown Petroleum and Natural Gas Lease Review
June 30, 2011 review date extended to August 31, 2011

The annual Saskatchewan Crown Petroleum and Natural Gas Lease Continuance Review provides for a 90-day extension to those leases with a valid well licence issued prior to April 1, 2011. The Ministry of Energy and Resources, in recognition of the unusually extreme weather conditions in the province this spring, is granting an automatic two-month extension to those leases continued for the Licence continuance reason, moving the review date from June 30, 2011 to August 31, 2011.

Please advise your members of the new review date and forward any questions to the undersigned at:
